CONFERENCE BROCHURE

About TLA International Energy Conference, 2016

Environmental sustainability and economic growth can happen only by proactive intervention in the Energy Sector. Access to reliable, sustainable and affordable energy is vital to ending extreme & cruel poverty in India and promoting shared prosperity. Lets join hand to support this Energy Conference for realising the goal of “*Energy for all*” in India.

Energy has become an important agenda of India’s energy planning process especially since climate change has taken centre stage in the domestic and international policy arena. To demonstrate its commitment in Energy (Power/Oil & Natural Gas/Coal) sector the government has set aggressive targets for renewable and several incentives and policy initiatives at the Central and State levels have been put in place both for grid connected and off-grid renewable energy. It is evident that the development of renewable energy sector hinges on the combination of legislative frameworks, funding mechanisms, institutional arrangements, and co-ordination mechanisms, which work together to support the implementation of energy strategies, policies and programmes.

“India’s Energy Challenges, Opportunities, Strategies & Solutions” aims at bringing together the International Investors, Strategists, Policy Makers, Business Leaders, Industry Partners and Subject Experts to discuss on the issues on Conservation of Energy and encouraging Investment in India in the Energy Sector with special emphasis on New & renewable sources of energy by deliberating and finding out ways for Energy Security of the Nation.

“*Energy for all*” is primary goal for progress of the nation. India’s maximum population is deficient in access to electricity and our present government is working towards and taking various initiatives to improve the electricity facility in India, Therefore through this conference we would like to give more emphasis towards government initiatives by discussing on various ways to provide new ideas, policies, program to contribute ourselves towards achieving government plans and goals. Through this conference we would also like to focus on strengthening Human resource to develop their skills and provide a platform to become part of start-up India government initiatives. It may not be out of place to mention that, energy is driven by increasing reliance on imported fuels, which is critical to meet India’s huge energy demand. Amplified import reliance also exposes the country to greater geopolitical risks and international price instability. Lastly, India is devoted to the mitigation of climate change, albeit defeating energy poverty and guaranteeing economic and social development remains a superior priority

TLA International Energy Conference 2016

New Delhi, INDIA

www.dgef.in

The International Energy Conference is scheduled to be held every year on 15th April at New Delhi. The objectives of the Conference are:-

- Encourage Investment in India in the Energy Sector with special emphasis on New & renewable sources of energy
